

The Key for High Performance

HP S700 High-Quality SSD

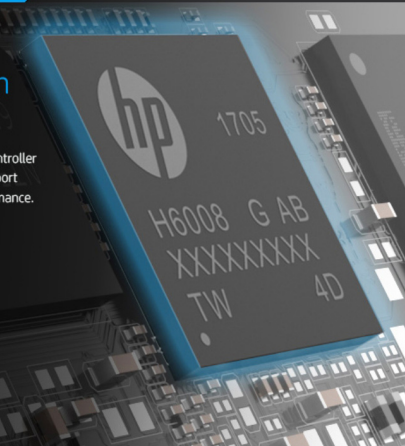

HP Controller Optimize Operation Algorithm

The S700 series feature a dual-core HP controller with four flash memory channels that support NANDXtend ECC for fast and stable performance. Maximize your computer's performance, and increase responsiveness.

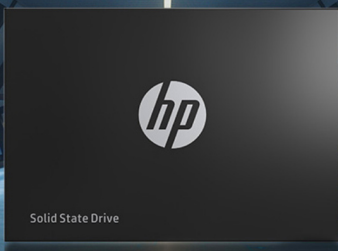

4 Channels

NANDXtend

Wide Applications and Compatibility Better Durability

HP SSD passes strict tests for SSD before delivery, including performance test, reliability test, compatibility test, application test, etc. S700 series supports NANDXtend ECC, self-monitoring and reporting technology (S.M.A.R.T.) and LDPC to improve error correction performance for better reliability and durability.
